

Model 592-9

Spray Humidifier

Ideal for Heat Pumps and Low-Temperature Heating Systems

Installation Package includes a Skuttle manual humidistat, self-piercing saddle valve, mounting template, mounting hardware, observation window and installation instructions.

Important: Installation of an A50 Interface Relay is recommended to ensure blower operation during humidifier cycle.

Specifications

- Dimensions (See photo, right)
- Plenum Opening 4" high x 2-1/2" wide
- Extension into Plenum 2-3/8" past mounting surface
- Solenoid Valve 24 volt, 6 watt, brass construction
- Standard Nozzle Size 0.50 GPH

NOTE: Ratings and calculations are in compliance with ARI Formula 610:

- Ceiling Height 8 feet
- Bonnet Temperature 120°F
- Return Air 75°F, 30% RH
- Total Static Pressure 0.20 inches

*Standard Equipment

GPH = Gallons per Hour

GPD = Gallons per Day

Features & Benefits

- **FOR USE IN SPECIALIZED APPLICATIONS ONLY:**
 - Designed for heat pumps and low-temperature heating systems
 - Water hardness must be 7 grains or less
 - Water pressure must be 40 PSI or greater
 - There must be 6 feet of straight, unimpeded ductwork after the spray nozzle
 - There must be no dead air space in the ductwork within 6 feet of the spray nozzle, where unevaporated water can collect
- **Durable, stainless steel atomizing nozzles** allow customized humidification and are easy to replace
- **Inline water filter** provides dependable, long-term operation
- **Copper catch basin** collects afterflow
- **Green light** scientifically indicates when unit is operating
